

Task 2: Predicting Customer Buying Behaviour British Airways Forage Job Simulation

By Parabjot Chander

Feature Importance in Random Forest Model

Findings

Good indicator to determine whether an customer will have booked an holiday or not.

- **Purchase Lead: number of days between travel date and booking date**
- **Route: origin -> destination flight route**
- **Flight Hour: hour of flight departure**

The accuracy of the model was approximately 0.85 (Accuracy) and 0.11 (Recall), showing that this model requires more improvement. I suggest adding more customer-centric features into the model
